January 9, 2004

Dear Mauricio,

On September 1 2003, your laboratory supplied validation data to support your HPLC whole blood assay for sirolimus. The data consisted of results from a comparison study using samples supplied by Wyeth, Collegeville, PA. The data provided were acceptable and your assay was approved on September 3, 2003. Since that time, your lab has participated in the sirolimus monthly proficiency testing scheme. To date, your lab has successfully completed this test indicating continued excellent performance of your assay.

If you need any further information or assistance, please contact me.

Sincerely,

David R. Hicks
Director
